PVP COOLDOWN TRADING GUIDE

Devastation Evoker — Arena Comps & Solo Shuffle

1. The Defensive Toolkit

- **Obsidian Scales:** Primary pre-emptive flat damage reduction. Optimal for physical damage, telegraphed burst, or pre-walling stuns.
- **Renewing Blaze:** Retroactive healing. Optimal for heavy DoT profiles and sustained burst where you can still act. *Do not use against one-shot burst.*
- **Time Stop (PvP Talent):** Ultimate immunity. Optimal for heavily telegraphed, massive lethal spells.
- **Hover / Rescue / Deep Breath:** Positional trading. Optimal for melee offensives where breaking Line of Sight (LoS) or creating distance is best.

2. 3v3 Arena Compositions

Setup Comps (RMP / Thug Cleave / Cupid)

Win Condition: Kidney Shot / HoJ / Intimidation synced with Combustion, Shadow Dance, or Wings.

- **Pre-emptive Obsidian Scales:** Anticipate the stun. If a Rogue steps to you, press Scales immediately before the Kidney Shot lands.
- **Time Stop:** If you survive the stun and see Secret Technique or Meteor starting, Time Stop to negate the damage window entirely.
- **Hover (LoS):** Against Hunters/Mages, if not stunned, simply breaking LoS is your best trade. Avoid Renewing Blaze here; you will die before the healing ticks.

Melee Cleaves (Turbo / TSG / Walking Dead)

Win Condition: Abomination Limb / Spear of Bastion / Leg Sweep synced with Ascendance, Avatar, or Pillar of Frost.

- **Hover + Rescue (Mobility):** Your absolute best defensive is distance. Rescue your healer to a pillar far away when gripped into Bladestorm.
- **Obsidian Scales:** Trade specifically when rooted/stunned during Colossus Smash or Strike of the Windlord.
- **Avoid Renewing Blaze:** Melee cleaves run heavy Mortal Strike effects (healing reductions). Blaze loses massive value unless you have already kited and dropped the MS debuff.

Wizard Cleaves (Shadowplay / MLX / God Comp)

Win Condition: Dark Soul / Void Eruption / Icy Veins cast while you or your healer are cross-CC'd.

- **Renewing Blaze:** MVP against SPriests and Affliction/Demo Warlocks. Pop it when they use primary cooldowns to let retroactive healing neutralize DoT pressure.
- **Time Stop:** Hold exclusively for one-shot spells like Chaos Bolt, Glacial Spike, or Void Torrent.
- **Obsidian Scales:** Use if pushed out into the open with no mobility left, forced to tank multiple casters.

Jungle Cleave / Feral Comps

Win Condition: Intimidation into Freezing Trap on your healer, followed by Feral Frenzy and Coordinated Assault.

- **Renewing Blaze:** Feral damage bypasses armor via bleeds. Blaze counters Feral Frenzy perfectly.
- **Hover:** Use to immune or clear roots so you can LoS the Hunter's Trueshot.
- **Rescue:** If your healer gets trapped, Rescue them to grant an instant shield to survive the cross-kill window.

3. Solo Shuffle Class Matchups

In Solo Shuffle, high dampening means Renewing Blaze loses value rapidly. Rely on Scales, Mobility, and Immunities.

Melee Matchups

- **Warrior (Arms/Fury): Avatar + Colossus Smash / Bladestorm.**
  Hover / Rescue (Kite). Never tank Avatar with Scales if you have movement. Force them to waste mobility chasing. Wall only if stuck in a Storm Bolt.
- **Rogue (Subtlety/Assassination): Shadow Dance / Deathmark.**
  Pre-emptive Scales (Sub). Wall the Kidney Shot directly. For Assa, **Renewing Blaze** early, but rely on **Time Stop** late in dampening.
- **Demon Hunter (Havoc): Essence Break + Metamorphosis.**
  Obsidian Scales. You must have Scales active during the stun/Essence Break window or you will die in three globals. Hover away after the stun fades.
- **Death Knight (Frost/Unholy): Pillar of Frost / Abomination Limb.**
  Rescue + Hover. Do not stand in Abom Limb. Rescue a teammate to jump out of the radius, then Hover to maintain distance.
- **Paladin (Retribution): Avenging Wrath (Wings).**
  Kite exclusively. Ret burst cuts through Scales in Shuffle. Run away until Wings drops. Wall the Hammer of Justice if you cannot run.

Caster Matchups

- **Mage (Fire/Frost): Combustion / Glacial Spike.**
  Time Stop or LoS. Time Stop the Meteor/Glacial Spike cast. Otherwise, hug a pillar and LoS the entire window.
- **Warlock (Destruction/Demonology): Dark Soul + Infernal / Demonic Tyrant.**
  Time Stop (Destro) / LoS (Demo). Hold Time Stop for the lethal Chaos Bolt. For Demo, simply walk behind a pillar when the Tyrant spawns.
- **Priest (Shadow): Void Eruption + Psyfiend.**
  Renewing Blaze. *Crucial:* Instantly kill the Psyfiend (Azure Sweep). Its 50% healing reduction will negate your Blaze.
- **Hunter (MM/BM): Trueshot / Bestial Wrath.**
  Line of Sight. Hug a pillar. If caught in a stun in the open, trade **Obsidian Scales**.
- **Shaman (Elemental): Stormkeeper + Ascendance.**
  Time Stop. When they Ascend and throw instant Lava Bursts, Time Stop immediately or LoS.

4. Golden Rules of Solo Shuffle

- **Do not overlap with your healer:** If you get stunned at low health, watch to see if your healer drops a major cooldown (Pain Suppression/Life Cocoon) on you *before* you press Scales or Time Stop.
- **Use Rescue defensively for teammates:** If your teammate is getting blown up and your healer is CC'd, Rescue them out of the melee pile. It grants a massive shield and breaks enemy uptime.
- **Hold Time Stop for the kill attempt:** Don't use Time Stop at 80% HP just because cooldowns were popped. Use it at 30% HP when the lethal projectile or global is incoming.
