DEVASTATION EVOKER PVP GUIDE

Midnight Season 1 — Comprehensive Breakdown (OCDGaming)

1. Stats & Gearing [00:00:43]

- **Stat Priority:** Haste > Versatility > Mastery.
- **Haste Thresholds:** Aim to sit above 20% Haste. Higher Haste is preferred to reliably cast Sleep Walk quickly and handle kicks.
- **Mastery Alternative:** If playing heavy control comps (like "Draco Cleave" with a Subtlety Rogue or Frost DK) where your setups are uncontested stuns, you can prioritize Mastery over Haste for raw un-kicked burst damage.
- **Conquest Gear:** Avoid Critical Strike completely as its effectiveness is heavily reduced in PvP. Focus on Haste/Versatility and Versatility/Mastery pieces.
- **Vendor Fix:** If you cannot see the 2-Handed Staff at the PvP vendor (seeing only daggers, maces, etc.), change the vendor dropdown filter at the top from "Evoker" to "All."

Crafting [00:02:17]

- **Ideal Crafted Slots:** Neck, Rings, and off-pieces (Wrist, Belt, or Feet) depending on conquest availability.
- **Embellishments:** Choose either the **Prismatic Focusing Iris** (passive consistent damage over time lens) or **Devouring Banding** (deals damage and passively boosts your highest secondary stat).

2. Best Arena Compositions [00:05:40]

- **Top Synergy:** Rogues and Death Knights (Draco Cleave).
- **Other Strong Pairings:** Hunters remain highly effective, and Warriors work well for "raw PvE damage, no setup, just rip it and go" strategies.

3. Evoker Class Tree Adjustments [00:05:16]

- **Anti-Caster Setup:** Spec into cooldown reduction for Quell (kick) putting it on a 1-minute cooldown. Combine this with Wing Buffet and Tail Swipe to continuously interrupt and lock down casters.
- **Anti-Melee Setup:** Drop *Enkindled* and pick up **Walloping Blow**. Wing Buffet will knock melee classes much further back and apply a 70% movement speed reduction.
- **Panacea:** Highly recommended for the extra passive healing.
- **Stretch Time:** A phenomenal defensive utility tool. Cast it at low health to give your healer a few free globals to save you with major cooldowns (like Life Cocoon or Ironbark).

4. Devastation S1 Tier Set & Builds [00:07:48]

Season 1 relies heavily on utilizing the 4-Piece Tier Set. It increases *Azure Sweep* damage by 50% (and an additional 100% to your primary target). You also gain an additional Azure Sweep when casting Eternity Surge, and casting Astral spells reduces the cooldown of Eternity Surge.

Tier Set Optimization: Play the 4-set utilizing Legs (Haste/Mastery), Gloves (Haste/Vers), Helm (Crit/Mastery), and choose between Chest (Crit/Haste) for more haste or Shoulders (Crit/Mastery) for more mastery.

Build A: Scalecommander (Best Overall) [00:10:22]

- **Shattering Stars:** Mandatory. When using Eternity Surge, it fires Shattering Stars. When *Scintillation* procs, it casts a 40% power Eternity Surge, automatically shooting two free Shattering Stars.
- **Combat Log Bug:** Note that the combat log currently bugs out and piles the Shattering Stars damage directly into the "Eternity Surge" spell tracker rather than separating it [00:08:31].
- **Iridescence Focus:** Boosts blue spells by 20%. When active, Azure Sweep damage jumps from ~14,000 to ~18,000, compounding beautifully with S1 Tier modifiers.
- **Event Horizon:** Once you complete the S1 Tier set, Event Horizon becomes incredibly powerful for cooldown reduction, fueling continuous Mass Disintegrates.

Build B: Flameshaper (Niche/Control) [00:13:08]

- Fun and thematic but setup-heavy. Avoid *Iridescence* since *Consume Flame* doesn't scale with it. Use **Scorch Embers** to gain 25% increased damage while Fire Breath is active.

5. Official Talent Import Strings

Scalecommander (Iridescence Stars - Main Arena Build)

```

```

6. PvP Talents [00:14:12]

- **Standard Trinity:** Obsidian Mettle, Unburdened Flight, and Time Stop.
- **Scouring Flame (Flameshaper):** Grants two charges of Fire Breath and -5s cooldown. A Level 1 Fire Breath strips two beneficial magic effects. Counter against Resto Druids/Shamans.
- **Divide and Conquer:** Play this *only* if running Draco Cleave. **Do not** use this in BGs/Blitz if you have ranged teammates, as it blocks Line of Sight for your own allies.
- **Nullifying Shroud:** Not recommended for Devastation (better for Preservation). Use Time Stop instead.

7. Burst Rotations [00:16:48]

Scalecommander Burst [00:20:10]

1. Oppressing Roar → Deep Breath (Stun) → Dragonrage
2. Tip the Scales → Eternity Surge
3. Fire Breath
4. Double Mass Disintegrate
5. Azure Sweep (Spread Bombardments)
6. Spam Disintegrate to extend Bombardment windows and push CDR for empowered abilities.

Flameshaper Burst [00:16:48]

1. Oppressing Roar → Deep Breath (Stun) → Dragonrage
2. Tip the Scales → Eternity Surge
3. Disintegrate → Azure Sweep
4. Fire Breath (Tap it to apply the 1-tick DoT to activate Consume Flame multipliers)
5. Spam Eternity Surge and weave Essence Bursts to proc Twin Flames.

8. Sustained Priority (Normal Rotation)

Once the initial Dragonrage burst window ends, follow these priorities to reset your next go.

Scalecommander Sustained Rotation [00:20:51]

- **Extend Bombardments:** Use **Azure Sweep** to spread your Bombardment debuff to other targets.

- **Titanic Wrath Optimization:** Only cast your Mass Disintegrates when you have an **Essence Burst** active. The *Titanic Wrath* talent grants a massive 15% damage increase to your Disintegrates when consuming an Essence Burst.
- **Maintain Cooldown Reduction (CDR):** Spam **Disintegrate** as your primary filler to extend the duration of the Bombardment window and aggressively push the cooldown reduction of your empowered spells.
- **Targeting Armor:** If you are focusing a single primary target, make sure your Bombardment ("armor") debuff stays strictly on them to tunnel damage.
- **Cycle Empowers:** Cast **Fire Breath** and **Eternity Surge** the moment they are off cooldown. With the S1 Tier set and constant Disintegrate CDR, hitting just two rotations of your empowered abilities will completely reset your **Deep Breath** for the next burst phase.

Flameshaper Sustained Rotation `[00:18:27]`

- **Maintain Fire Breath:** Always keep the **Fire Breath** DoT active. It doesn't need to be fully charged—a Level 1 tap is sufficient because its primary purpose is activating the *Consume Flame* and *Scorch Embers* multipliers (a 25% flat damage increase).
- **Risen Fury Uptime:** You will passively gain free Essence Bursts via the *Risen Fury* talent, allowing you to sustain damage.
- **Living Flame → Essence Burst Engine:** Whenever you get a free **Living Flame** proc, cast it immediately to try and generate two **Essence Bursts**.
- **Trigger Twin Flames:** Spend your Essence Bursts as fast as you generate them. The goal is to rapidly cycle **Eternity Surge** and trigger the *Twin Flames* passive to keep steady pressure.

9. Advanced Niche Mechanics `[00:23:56]`

- **Mass Disintegrate Single-Target Buff:** Hits for 10% *more* damage per missing target. It excels in single-target burst scenarios.
- **The "Root Bypass" Trick:** If multiple enemies are grouped, your cleaves (Mass Disintegrate / Eternity Surge) will automatically leech to them. However, if you **Root** secondary targets right next to your primary target, your Mass Disintegrate will actively ignore the rooted targets and funnel all its focused damage modifiers directly into your primary un-rooted target.
